SAVED AND WE KNOW IT

WHAT A JOY it was on Tuesday 9th June to chat with "Jemimah", who has come to Christ because the Covid-19 Crisis literally put the fear of death into her, and only Christ who is The Life could give her real life - now and eternally. Remember the Scripture that "perfect love casts out fear" (1 John 4:18). This especially includes the fear of dying. Only the Christian knows for sure we will see eternal life as well as receiving a new body in Christ's New Heaven and Earth. It's many years since we first prayed for this young lady. Give thanks with us and pray the Lord Jesus will use her mightily.

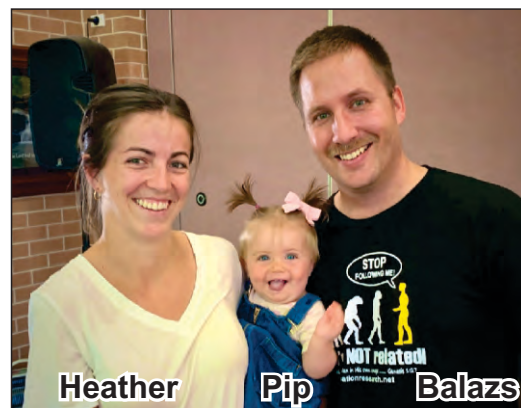

BEFORE I WAS A CHRISTIAN I used to be a very arrogant and proud atheist. I studied civil engineering out of arrogance, hoping to chase wealth and prestige – very selfish things. But I also did subjects such as rock mechanics, geology, and earth science. I was taught in a very secular way, especially at university. It was quite anti-Christian. But one thing I came away with was "there is no such thing as God!" That was my mentality. If there is no God, the concept of good or bad is technically irrelevant – there's no such thing as right or wrong. But I got to a stage where God started to work in my heart. My little brother and sister had started attending Grace Bible Church in Brisbane where John Mackay goes. They invited me to a Young Adult's Group where John was speaking on dinosaurs at Pastor Craig's house. So I thought, "Let's see what these Jesus freaks say about dinosaurs." I thought I'd go and show John a thing or two!

John spoke, questions were asked, questions were answered, and I couldn't really refute anything. Everything he said made sense. I had the mind set that as much as I didn't want there to be a God, I couldn't reject truth. I thought if something makes sense or is logical, I can't just reject that. So I needed to think this through. Everything John said made sense – even what I thought was geology, or the sciences I learned.

Walking back to my car I was just furious inside. I was so angry – not at John. Not at anyone there, but at the fact that what he said made sense. That frustrated me because I thought, "If what he's saying is true, and God's word is true, and if Noah's Flood is true, then the God of the Bible is true and real, and I'm in big trouble!" That's what made me so angry. Yet I can definitely say God used what John said as a first step in my walk to becoming a Christian.

VOLUNTEERS BACK

Covid lockdown meant no volunteers were allowed to help get the March newsletter out, so welcome to the upgraded June version with much to encourage and bless. Pray for our helpers and to be a volunteer contact info@creationresearch.net or Ph. (07) 3206 4467/ 0488740 407

ANOTHER THORNY FIRST makes the point!

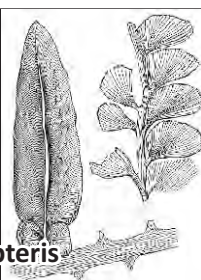

Joseph Hubbard is the first member of our team to find fossil thorns in the coal layers of Tennessee where John and the USA team have been excavating for some 30 years. Pictured below is the first example of a Neuropteris stem we found in middle Tennessee showing thorns. See middle diagram below of this historically recognised fern with thorns. John Mackay has found specimens in Canada, England and other countries, but not previously Tennessee. So these rocks in Tennessee were also formed after Adam sinned and God cursed the ground with thorns. John also found two slabs in an abandoned mine dump, showing both sides of a fossil amphibian footprint track (below). Your support and prayers enable us to continue to find world-class specimens. No you haven't seen things like this in your local secular museum, so look what God is doing for us! Get behind our museum projects with your finance, and your prayers.

Joseph

Neuropteris

Foot Prints

John

DONATE ONLINE www.creationresearch.net

Craig Hawkins breathes a sigh of joy as several years of hard work pay off and our Tassy Creation Discovery Centre zooms ahead in Covid break. Shown above are several of Steve Cardno's murals, to visually assist people to see real-world Biblical history. The museum has the advantage of being able to use our high-tech interactive dinosaurs and Noah's Ark we had done for our Jurassic Ark Open Day 2019. Keep praying for Craig, De-Arn and the team.

ABBEY FOSSIL TRAINING. Pic above is Abbey in our office, learning how to restore fossils to museum display grade. One plus from our COVID free time is we don't have to travel anywhere, and we are thrilled to have begun to organise the 20 – 30,000 fossils in our collection from microscopic to megascopic dinosaur category for the museum. Abbey is shown working on just some of these beautiful plants preserved by rapid burial during Noah's Flood. Pray for Abbey as she continues to learn, and experiment, so that our final museum results will indeed be spectacular for Jesus.

JURASSIC ARK "RE-OPENS" OCTOBER 10TH

JOIN US 10.30 - 2.30PM. FREE. LIMITED NUMBERS YOU MUST BOOK.

or Email: info@creationresearch.net

CANADA MUSEUM UPDATE BY MARTIN LEGEMAATE It's certainly been a challenging year during COVID for the Ontario Creation Research museum. When Goodwood Baptist Church closed its physical doors in spring, our museum housed in the basement closed also. To keep folks encouraged we launched a virtual museum tour in April where you can view displays and for each show case we feature one fossil showing evidence for creation, catastrophe or intelligent design.

Despite the lockdown research and fossil collecting carried on. In April I went with some seasoned fossil collectors to Norland Quarry to search for fossil upgrades for the museum and wasn't disappointed.

Kevin B, Kevin K and Martin (right) at the quarry practicing social distancing!

The Lord provided just the fossils I was looking for. One of them an Orthocone shell with colour banding. Orthocones are related to the coiled Nautilus that are still living today. Finding colour banding intact on a shell is great evidence for rapid burial. This specimen will replace a much smaller one in a display.

These fossils will be going to one of our mobile display cases that was set up in January at Pioneer Baptist Church in Norland. Pioneer has been supporting the ministry by allowing us to use their building during fossil trips in the area.

KEEP PRAYING FOR THIS VITAL EVIDENCE MINISTRY IN CANADA

UNBELIEVABLE RESPONSE TO ONE BLOOD—MANY RACES WEBINAR WITH JOE, DIANE AND JOHN

In July John Mackay, Joseph Hubbard and Diane Eager presented our first Creation Research webinar: *“One Blood, Many Races”*. A webinar is a live presentation broadcast over the Net so people view live, and engage in QnA.

John dealt with the history of the term “race”. Did you know it first applied to races of plants, and wines? John also gave an overview of the real history of man, starting with Adam and Eve, going through Noah and his three sons, to the Tower of Babel, and then to nations and tribes across the world. Diane explained how variation in skin colour, and the world-wide distribution of different skin colours result from degeneration of skin colour genes combined with human migration following God's judgement at the Tower of Babel. Joseph showed Neanderthals were simply a race of fully human people, and their skeletons and artefacts indicate they were strong, highly intelligent, resourceful people, but have sadly died out in the post-Babel world.

There were good questions from those who watched live, and many more from people viewing the video on YouTube. Apart from one critic who called Diane's explanation of skin colour “illogical hogwash”, the response was overwhelmingly positive. Watch **ONE BLOOD** on - www.creationresearch.net click YouTube.

RESPONSE TO RACES WEBINAR has been absolutely unexpected – we posted it on YouTube on the Wednesday, and for the next two weeks, the promo had between 1 - 200 hits per hour from just about every country and race on the planet. Pray as we adapt our ministry to modern technology that people will be won to Christ by this. We've never had a response like it!

BLESSING LOCKED DOWN BIBLE COLLEGE as we master some of the new electronic media. We have reached out to Bible College students in Victoria and shared in the apologetics course.

ROSE AGAIN Dr Diane Eager (right) has loved roses and has recorded a second rose programs. Enjoy the beauty of God's handiwork, and the things we can learn about God's genius in colour and design. Enjoy her videos on Facebook.

ZOOM TO THE MIDDLE EAST MINISTRY Praise the Lord for the request from a Christian in England who had been working in the Middle East, and attended some of our UK meetings in 2019, as to whether we could speak to ‘their’ group. It took quite a while to organise, but gratefully the Lord “pulled it off”. When we asked how long we'd have to speak – their very non-Western reply came back – “as long you like, and twice please”.

Our first seminar went for two and a half hours and was question-filled at the end. We spoke to folks from Doha, Dubai, and one other town in the Middle East whose name we couldn't catch, as well as surprisingly having an English church joining half way through. The immediate request when we finished was, “Can you do this again?” Pray for great wisdom.

RACISM WEBINAR – Joseph, John and Eric Hovind were involved September in the USA on the crucial subject of racism. Director Eric was fascinated by our first seminar “One Blood – Many Races”, so it was not surprising he asked us to deal with what actually is a race. Despite the common evangelistic approach that there is only one race – this is a fallacy. There is one family of man, or only one mankind, but just as the green rose below belongs to a “scientifically definable “race” of roses, which is the longstanding use of the term. Race simply means any group which has subgroups that are distinguishable – by shape, size, colour, culture, etc. The whole theme of our second webinar was dealing with the problems arising when we take the real differences that exist and think that our “race” is the best, and all others are to be excluded or, at worst, persecuted and eliminated. That is the real issue – and it results from Adam's rebellion against God. Whether it's white on white, white on black, or black vs Asian – racism is just one minor result of “me-ism”. It's sin, and sin has always got “I” in the middle and there is only one solution, a Saviour Who's name is Jesus and He's the only way mankind can become one.

UK FILM TEAM

WELCOME ABOARD TO SIMON TERRY, who is now headmaster of a UK Christian School. He contacted us early in 2020 wanting to coordinate his curriculum with Joseph Hubbard and our main Creation Research HQ here in Australia. We have worked with Simon over many years, particularly on ministry and on field trips. Pray as he now takes up this new position, that what he desires to do in Christian education will indeed be a real blessing, and we will bless him with all the Technical Education Info. Simon is an expert on snails and how even they obey God's creation commands to "multiply and fill the earth" as well as "Produce their own kind."

AFTER THEIR KIND

WEBINARS Joseph (UK) recently did 2 educational webinars on creation for African teachers. These were subsidised events. Surprisingly one science teacher from Australia was listening and now wants to bring his students to Jurassic Ark.

SUPPORT JOSEPH – SPECIAL WAY OVERPRICED DEAL

Complete set of Joseph's first books - 4 UK fossil field guides. Deal includes a special Cardno-Toon done for Joseph and Sarah-Ann's September 12 wedding plus a signed "Pray and support us" photograph. Each book is signed by Joseph. Normally only £4 (\$10) each, but especially for you we are charging \$100 a set (or more if you want).

They are way overpriced, because our purpose is to provide support for this young couple as they start married life and ministry in Creation Research. This is an opportunity to pay more than you'd ever have to pay, just so we can bless this young couple. Don't wait – spend your money now. Web Order in advance on creationresearch.net/shop. This way overpriced opportunity won't come your way again soon. Only 50 sets available in Australia.

MEET MR AND MRS HUBBARD - Joseph and Sarah in the UK got married September 12th, after much uncertainty with British Government rules banning weddings. Joseph and Sarah finally got a venue in Wales where they could have people outdoors in a marquee (praise God for UK summertime – long, balmy days). We praise the Lord with them and ask you to pray for this young couple. Above they are pictured in front of their first house – they've been working hard renovating this caravan and annex, with serviced land provided free of charge - amen!

ONE UK MINISTRY NEED concerning transport. Sarah-Ann has a tiny vehicle sufficient for the filming ministry she's been doing. But at present, the Van we bought several years ago for £5000 – has come unstuck. The mechanic has said the conked out engine requires at least £3000 to repair. We've basically reached the conclusion it's probably easier to trade up. You may remember we purchased it to save money hiring vehicles for John's two month UK ministry tours, and it certainly saved us a heap. We value your prayers for wisdom and obviously the finance, as the UK ministry is slowly beginning to take off.

NEED ANSWERS? See
www.creationresearch.net
 click QnA

DR. GLENN WILSON (above) visited Australia mid 2019, particularly to visit Jurassic Ark and get involved with the research projects we are doing. Glenn is a professional scientist for the US government. Joseph Hubbard and John caught up with him again in Tennessee late 2019. Not only did we enjoy a great time of fellowship during Thanksgiving with Glenn and his family, but we met with our USA “Society” members to discuss Glenn’s request: “We need a Jurassic Ark in the USA!” Glenn says Ken Ham’s museum is great, but our JA museum is practical - you can touch things, dig things, bang things, do experiments and get physically involved with a great Bible teaching program as well. We already have one USA family pondering about giving 40 acres for that project. Pray for our USA team, as we discuss the practicalities of such an issue.

A CREATION ZOO TOO. Glenn and Joe visited the “Creation Zoo” (above right) which is a world Zoo with a Creation perspective. The owner and host Dr Marc Bradley, who not only made our team members totally welcome, but has offered to assist us in every way to get Jurassic Ark Live in the USA and OZ. What will it involve as we use all animals that show just how good God’s world was in the beginning, when lions and tigers were harmless vegetarians, plus show after the Fall and the Flood, they moved from being harmless to being savage and or venomous today.

Visit Creation Kingdom Zoo Online www.creationkingdomzoo.com

OUR AIM FOR 2021- JURASSIC ARK LIVE OZ!

Joseph Hubbard (UK) joined Creation Research in 2014, and went full time at the start of July 2019, and has now completed 2.5 years in-depth training and is well suited for the tough UK scene. In addition to his Geology Degree, Joseph is now also a fully qualified zoo-keeper. When John and Joe toured the USA in 2019, Joe was an instant hit with his ability to not only talk about snakes and their Genesis 3 loss of legs, but to handle them with ease (and fun) on TV, in churches, schools, etc. Joseph would like to see Jurassic Ark Downunder have a python component (you can still see the tiny remains of their legs), plus a poison arrow frog component (only poisonous when they eat the wrong thing). Also an Iguana, because it is venomous, but only eats plants!

Thanks for your support which makes Joseph’s training possible. Continue to financially and prayerfully support as Creation Research expands around the globe.

CHALLENGING NEED We are looking for a young man, willing to give all for Christ. You must have a science background, with God’s gifting to speak and share, teach and preach. You are willing to trust Jesus in everything and know that regardless of society or politics – your provider will be the Lord Jesus Christ. Yes, we have Joseph in the UK doing wonderful ministry and research. But we do need someone here in Australia. Are you that young man? Or do you know someone who could be that young man?

DR DIANE EAGER'S OLD MINISTRY LAPTOP is approaching dinosaur age in IT terms, and we do need to replace it as the screen is basically no longer readable. Estimated cost \$2000.

UK MINISTRY NEED. You may remember we purchased a UK Van several years ago for £5000 to save money hiring vehicles for John's two month UK ministry tours, and it certainly has saved us way more than we paid for it. The mechanic now says the conked out engine requires at least £3000 to repair. We've basically concluded it's probably better to trade up. We value your prayers for wisdom and obviously the finance, as the UK ministry is slowly re-beginning to take off (post Covid).

NEEDED ONE YOUNG MAN, called of the Lord Jesus to minister in Creation Research. Qualifications: 1. Is saved; 2. Serves Christ as Lord daily; 3. Knows the Word of God; 4. Has a gift of speaking and teaching; 5. Has an expertise in either geology or biology; 6. Comes with a commendation from his local church. Apply direct to John Mackay on info@creationresearch.net

FOSSIL COVER SHEDS – JURASSIC ARK – You may remember the destruction the 2011 floods caused to our fossil flood log jam site – now after proving there are thousands of fossil logs still underground – we are proceeding with constructing protective sheds over the site and we need your help. We've had an engineer on site evaluating how to build these. Costs work out at roughly \$10,000 per hundred square metres. Total number of covers needed is seven.

STORAGE CONTAINER As the amount of equipment being used at Jurassic Ark increases, we are in need of a large shipping container on site. Estimated cost \$3000.

JURASSIC ARK has been a major Covid expense with gardens, experiments, displays, staff etc. to be maintained. Help appreciated with all overhead costs. Small groups now OK.

STAFF AND HELPERS WHO NEED YOUR SUPPORT: John, Anne, Sharon, Abbey, Ben, Daryl, Diane, Joseph and Sarah depend on your donations.

RESEARCH INTO RAPID COAL OIL, GAS and fossil formation is proceeding like a house on fire as Covid shutdown gives us time to catch up on research. Our surprising results have been circulated to quite a few professors. Get behind these research efforts with prayer and support. More details for any of these contact John at info@creationresearch.net. See them October 10th.

All below paid for with your gifts. Thank you for your blessings.

NEW SCHOOL MATERIALS PRODUCED as a 3 part series of MP4's completed so you can share the exciting and debate winning things God has taught us on how anyone can recognise God's creation! Vital for homeschool, public school, and uni students, as well as church youth groups. Available on www.creationresearch.net shop Mp4s

VIRTUAL OUTREACH SUCCESS through one or two Facebook videos daily. Lots of prep time. Some reach over 100,000 people who view them in full, and 30 to 40,000 new viewers on average each week (many unbelievers). Your help with costs appreciated. **VIEW FREE** on Facebook Creation Research.

7th CHILDREN'S BOOK PRINTED – “Adam and Eve and the Two Bites”. A real help for kids to understand the seriousness of sin and the joy of a Saviour.

YOUTUBE TV SUCCESS as our UK and the Aussie teams combined to produce a half hour program each week during Covid lockdown. Pray for production teams Ben and John in OZ, and Joseph, Sarah and Katie in the UK.

CRASHED UK COMPUTER in May and has been replaced and so has funds - with much thanks.

NOW MULCHED - JURASSIC ARK - A real help in both drought and flood protection. Jurassic Ark is all about showing people how silly it is to think you can have gardens without plants and plants without gardens. Mulch is a classic example of God's design.

Post: Creation Research: P.O. Box 260, Capalaba Qld 4157

Obviously I'm a fish, and my little friend beside me is a pine plant frond. But how did we both get here in this black rock? The frond is lying on its side and I'm not. I obviously didn't die and float to the surface like in a fish tank. You may have noticed dead fish float usually upside down or sideways, then they blow up and sink. I didn't blow up, and my guts are still intact. But my plant friend is lying on its side, yet I'm flattened. I've obviously been buried alive before I could swim another smidgen. Since pine trees don't grow with fish, the plant's been washed into place, and the current has been coming from right top to left bottom. See how the plant is facing, and see the same pushed curve in my body. We were both travelling along in the same muck and we haven't moved since the muck stopped. I'm definitely a rapid flood burial.

I was found when they re-opened a gold mine. I wasn't there when they had shut the mine after the price of gold dropped. In between, water from Queensland's Mary River had flooded the mine - a reoccurring problem for goldmines around the Gympie region, so the price of gold has to be greater than the cost of digging it up plus pumping the water out.

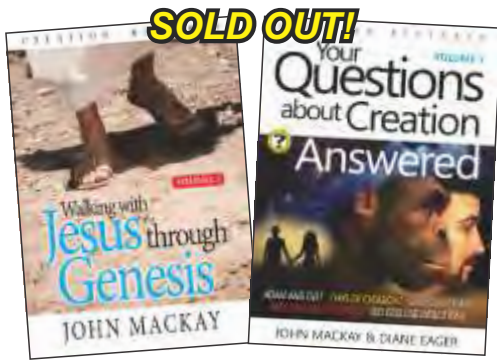

Did you notice the timber framing preserved as a mould on my top left-hand corner? Did you spot the copper wire running through the middle of my circular blob? They have tested my minerals and found I contain calcium, carbon, oxygen and even silica, all of which are found in rocks around Gympie. And yes, the copper is from old electric wires that provided mine lighting. I was part of a big stalactite that had grown down the electric wire, then filled in between the wire and the L-shaped posts. We are all taught that stalactites take long ages to form, but how long did I take? Gold was only found in Gympie in 1864. Wonder when electricity came on? Can you figure out the oldest I could possibly be? Then figure out the error in the statements that cave stalactites take vast ages to grow, therefore the world must be so very old, the Bible could not be true?

My broken dinosaur bone has a lot of clues that I died after Adam's sin. Not only because I'm dead, and death came with Adam, but because God made the world very good, and if you know anything about bones, you should have noticed that inside my long bone, there are round cavities, which are produced by nasty tumours. I'm one of the dinosaur bones John Mackay found on the border of USA and Canada many years ago, and he's only just got around to restoring me as a whole bone. A collapsing roof of his storage shed smashed me and I needed lots of restoring, so good old John put me back together again – here's one bone restored. The evidence shows I'm a dinosaur who died, but that I died in a world that was no longer very good. Tumours in your bones are a real pain!

Now here's what John Mackay says: The importance of these observations – the Christians who think God made the dinosaurs using evolution and they lived for millions of years and died out long before man evolved, couldn't insult God more, because He tells us He made the world good, and that meant no disease, no tumours. All the things that are not good came into existence only after man sinned. But that's the real issue – we don't like having the Creator Owner God tell us what sin is and that it can only be fixed through Jesus. This whole Evolution vs Creation issue is not really about the science – it's about the authority of the universe owning God and His Word, and the nature and person of the One and only way back to the Father is the Lord Jesus Christ as Saviour.

It's always a joy when books written by and printed for Creation Research sell out. Recently, we've had to reprint a second edition of "Walking with Jesus through Genesis", so we've added a new video introduction which you see for free by downloading our Dreemar app. We've had incredible response to this Bible study, as we take people from Genesis 1 through the first day of Creation, with Christ at its centre.

PLUS we've had to reprint our "Your Questions about Creation" book by John Mackay and Diane Eager, so rejoice with us, and get your copy if you haven't got it already. In fact, get 10, and share them around. Spread the word – tell the truth – Available: www.creationresearch.net/shop.

ENJOY OUR NEXT WEBINAR OCTOBER 1ST

ALL OR NONE! Join John Mackay and Diane Eager in a fascinating look at how nothing in the living world works in isolation. God created the world filled with fully functioning ecosystems, where plants, animals, fungi and microbes worked together for mutual benefit - the opposite of Darwin's "struggle for life". Don't miss seeing the exciting genius of God's handiwork in how living things need each other, and can only function because they were fully equipped to work together from the beginning. Step by step evolution is a lie. Be part of the next Creation Research Webinar ... (date, times, etc.) **Watch our web site for details.**

THE LORD BLESSED US with great finds as Daryl Brenton and John Mackay (right below) spent a September day in the field. Not only did we find beautiful fossil ferns in so-called Triassic rocks, but all ferns were 3-D impressions with original material replaced by various pink- brown compounds of iron.

FOSSIL MUSEUM GAINS

Look at close-ups on the left – and notice the 3D shape brought out by shadows. These fossils were flood deposited and rapidly buried.

PLUS there are 2 types of ferns – ones that are still alive such as tree ferns, and Y shaped ones called seed ferns, which seem to have died out, leaving only spore producing ferns. Extinction and devolution are the real history of planet Earth - a "Rock Solid" fact supporting the Bible record.

VIEW OTHER MUSEUM GAINS [HERE](#)

LETTERS

BOOK BLESSING I read your book "Who Made All The Dinosaurs" with both my boys last night. I actually missed a couple of interactive moments the first time round that my younger son picked up when I read it to him, which I think is great! It means they'll want to read it again and again to find more hidden gems ☺ They especially loved the talking dinosaurs and now they can't wait to visit Jurassic ark!

RACES "We watched the Creation Research webinar earlier this week on YouTube and very much enjoyed it - good to see you all in action again. Well done for getting the technology to work so well! The presentations were excellent and it was good to have the questions coming in. Really appreciated learning more about Neanderthal man, too - all potentially useful for outreach purposes." **Watch this program on - www.creationresearch.net click YouTube.**
