TASMANIAN MUSEUM OPENS

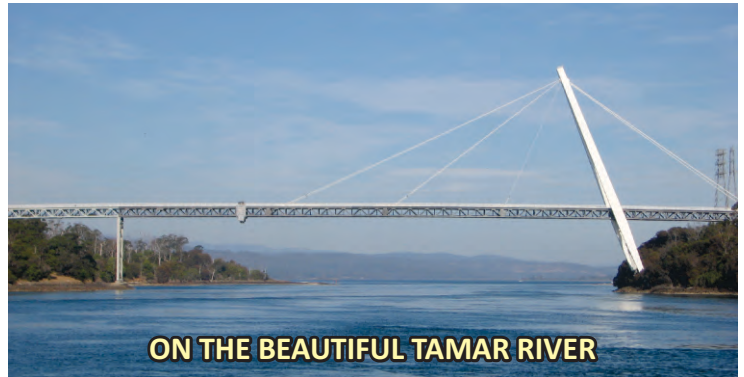

Craig

THE CONCEPT 2011. We asked you to pray for the possibility of a Creation Museum in a prime Tasmanian tourist site just north of Launceston. We shared that "expected minimal cost would be \$50,000 to set up" but we encouraged you to get behind this project, and pray for a young Craig Hawkins (left) as he uses Seahorse World as a venue for promoting Creation Research DVDs, fossils, etc.

POSSIBLE MURAL and SITE

ON THE BEAUTIFUL TAMAR RIVER

THE RESULT FEBRUARY 2021 - the museum is a reality! You couldn't pick a worse time to open a new outreach attraction but despite the fact that most tourists have been locked out of Tasmania, some of our first visitors were resident Chinese students and a very antagonistic sceptic who gave Craig and the team great opportunities to share not just the facts about the creation, but the challenge of the good news of the Creator Christ who recreates sinful man in His image. Special thank you to all whose donations made this possible. Pray for the team below. Come see the great work the Lord has put into our hands.

Noah's Flood

JURASSIC ARK 2011

Ten Years Ago

Flood at peak covers 95% of our Jurassic Ark excavation

New mini Grand Canyon

Only this fossil log survived unscathed

All work and no play. Can you recommend a good brand of detergent?

First drainage trench put in

JURASSIC ARK 2021

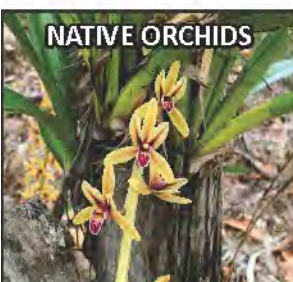

Ten Years Later

How good is your memory? 10-15 years ago the world was mostly bowing to the prophets of doom from the Global Warming religion. Remember - it was never going to rain – the dams would never fill – no cool seasons ever again! Then in January 2011 it started to rain from the top of Australia progressively flooding down the east coast into Tasmania. Dams filled, flooding was everywhere and 'Global Warming' took a severe publicity hit, slowly devolving into the more innocuous Climate Change - an easier to sell, but rather meaningless term, since history tells us climate has always changed daily, yearly, etc, just as the Lord said it would when he told Noah after the Flood, that until the end of the world there would be regular patterns and cycles including times of cold and heat. (Genesis 8:22)

Then 2020 brought Covid – the politics and profits of fear – yes we spelt profits exactly as we meant. Through the last two years, covid chaos has driven climate change into impoverished obscurity. But now with a so-called miracle vaccine “claiming up to 99% immunity” and Trump pushed off centre stage, don't miss the fact that Climate Change has rapidly re-evolved back to Global Warming. Headlines tell us the Thames froze over because of Global Warming. Texas snowed under for the same reason. In the week this was written a huge number of articles appeared totally abandoning the mild 'Climate Change' term and heavily backing Global Warming guilt trips, pushing for more pennies and politics to eliminate truth.

Sadly, from most Christian leaders, we don't hear that God is both inventor of viruses, and the One who brings judgement or blessing via both health and climate. What is even more tragic is that many Christian leaders don't see any connection between the immorality of nations, e.g. abortions, euthanasia, out of control youth crime, and God's dealing with man.

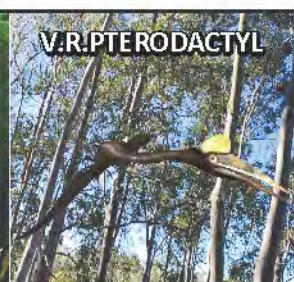

2021 has been an interesting year starting with predictions of La Nina – a more than usual wet cycle Downunder, yet absolutely no predictions of super cold Upover. Sadly many parts of Oz are not yet wet including Jurassic Ark where our dams are really low, because we use lots of water to keep the wonderful botanic gardens alive which we planted after the 2011 devastation. They look truly beautiful and unique worldwide (below). God gave us dominion and responsibility and Jesus told us to always keep our hand to the plough in His work, so thanks to all who support.

NATIVE ORCHIDS

NATIVE BIRDS

V.R. PTERODACTYL

NATIVE TREE FERNS

OUTDOOR CLASSROOM

JOSEPH HUBBARD

FABULOUS NEW ADDITIONS to the UK Museum Collection, including a fantastic new and very rare rhino skull (left) from a Chinese extinct Chillotherium (right). Praise the Lord for enabling us to acquire this skull way under the evaluated cost, making it a great new addition to our UK museum. The point? It's supposedly 13 million years old, and yet it's still a rhino. Its protruding canine teeth make it slightly different to modern African or Asian Rhinoceros but a rhino, nonetheless. Change? Yes. Evolution? No! Devolution most likely.

JOSEPH HUBBARD SPOKE at the AiG UK online conference 'Contending for Creation January 9'. Joseph addressed "How to recognise a flood deposit" using some of our most up-to-date Creation Research.

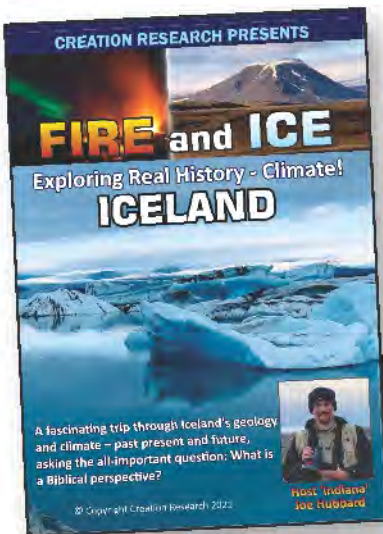

ARCHAEOLOGICAL GAINS FOR CREATION RESEARCH UK MUSEUM: 2020-21 has seen extensive artefacts added to our museum's collection, of over 30 years of fossil collecting by John and Joseph. New artefacts include a stunning Mesopotamian cuniform tablet (left) which mentions the Assyrian King Sennacherib, recorded in 2 Kings 18-19, who went to war with Judah, but was thwarted by a miraculous act of God after righteous King Hezekiah prayed for deliverance. Such artefacts, along with seals, pottery and figurines from Abraham's day to Jesus' time are an exciting part of our Creation Research Museum's project that will enable the Project to be unique in the UK – if not the World! Keep up your support.

NEW DOCUMENTARY FROM JOSEPH AND SARAH ANN

August 2019, climate activists scaled Iceland's Ok volcano, to hold a funeral commemorating its now-extinct glacier Okjokull. Their plea was simple – "Humans are destroying the planet. We must act now to save it."

October 2020, Creation Researcher 'Indiana' Joe Hubbard travelled to Iceland to investigate these claims and get a full and Biblical picture of climate history. Is there really a climate emergency to fear? What does Iceland's past teach us about the future? Join 'Indiana' Joe as he explores Iceland's rocks, glaciers and climate. Discover important links to the Bible and the future of Planet Earth. **1.5 HOURS 3 PART SPECIAL**

STREAMING NEW - AVAILABLE ALSO AS DVD AND MP4

OUR APOLOGIES AS COVID LOCKDOWN reaped havoc with our Documentary schedule for 'Fire and Ice'. It was planned for release before Christmas, when suddenly new UK Covid lockdowns and lock outs prevented any serious travel even within the UK, which sadly added two months to our project. Yes this has been as frustrating for us as for those of you who have ordered. But it is ready now and you will enjoy this great project.

A WORD FROM THE DIRECTOR

John Mackay
International Director of
Creation Research

JESUS' TESTIMONY

The February 2021 Media assures us the majority want assisted suicide. Yet we don't know a single person who was actually asked by any media rep. We certainly weren't! But we do notice the push to insist a claimed majority means politicians must legislate for it in a democracy! The same movers have already got assisted murder of infants into the books, i.e. abortion. The politicians never seem to demand proof or testimony that the majority actually want this. And if you haven't noticed, the term Global Warming is back with a vengeance ...despite the evidence or testimony of freezing around the globe.

A lawyer was in an audience I was addressing, so I asked him what a testimony was supposed to be? "The truth" he quickly replied! That by the way, is why lawyers are paid to probe, investigate, test and challenge any testimony in legal proceedings. They are looking for false testimonies. Statements that are untrue even if popular.

However, it is just one testimony that concerns us as we write today. It's been self-labelled as a testimony right from its origin. No it's not the testimony of a man or a woman, but of the Creator God. Remember the Ten Commandments? The record reports; "God gave Moses, when he had finished speaking with him on Mount Sinai, the two tablets of the **testimony**, tablets of stone, written with the finger of God". (Exodus 31:18) After Moses had brought down the first set of the 10 commandments and discovered the people were worshipping a gold effigy of the Egyptian Bull god, Moses smashed the first set of the tablets in anger. God then told Moses when he re-ascended Mt Sinai, "Cut for yourself two tablets of stone like the first, and I will write on the tablets the words that were on the first tablets, which you broke." (Exodus 34:1) After Moses spent a second time with God on the mountain, he again came down the mountain "with the two tablets of the **testimony**" (Exodus 34:29). Sadly many academics, scientists, church leaders and pew sitters sadly dismiss this as a Jewish myth.

Nowhere does the Bible treat the Ten Commandments as anything but the actual Word or Testimony of the Lord, e.g. at the giving of the first set we read "God spoke all these words" (Exodus 20:1). In his address to the people of Israel recorded in Deuteronomy, Moses reminded them God not only spoke the commandments, but He also wrote them ... twice. We read "And the Lord gave me the two tablets of stone written with the finger of God, and on them were all the words that the Lord had spoken with you on the mountain out of the midst of the fire on the day of the assembly" (Deuteronomy 9:10).

As our lawyer friend states "if any part of a written or spoken testimony is not true, the whole is rejected as invalid". Including in this case the rule about witnesses which we use in courts of law and unknown to most is derived from these same commandments. 'You shall not bear false testimony' (Ex 20:16). Note well that it is the Creator Christ who is the Word of the Lord who testified in the commandments that He made the world in six days. So all of those leaders of academia, theology or politics who dismiss the six days, have actually moved to dismiss all God's commandments including speaking the truth. No wonder most move on to legislate the mass murder of infants, block Gender Menders, promote BLM destruction, push climate lies and cash in on Covid controls. Note well—we will all give eternal account to the One who is truth, for He cannot lie. He did make the heavens and the earth in just six days and His moral authority is based on that. When we portray Christ any other way we will be held accountable for calling him a liar - someone who gave false testimony, and therefore hypocritically took the moral high ground in labelling false testimony a grievous sin in the ten commandments.

Moses' successor Joshua challenged the people to "... fear the Lord and serve him - choose this day whom you will serve - the gods of this world or the real God. But as for me and my house, we will serve the Lord" (Joshua 24:14-15). If you and I want our country and community mended ..so murder is labelled for what it is, whether babes or the elderly, and God's world and climate are seen for what they really are, then you and I must make the same choice.

PRAY FOR THE TASMANIAN TEAM

VOLUNTEERS TRAINING DAY 2021

From left Derek, Carl, Craig, Gray, Geoff.

Craig, Rochelle, De Arn, John, Brendan

The absence of visitors at Jurassic Ark 20-21, due to Covid, has provided lots more opportunities for excavation than normal, as young men shown, find and excavate a great new petrified log.

They not only fully excavated it, they coated it with our special preservative liquid to overcome the excess iron in the sediment turning to rust after exposure to the air. As many new car owners know, rust expands and pushes paint off and in general causes things to fall to pieces – rocks included.

Note the tree base (left) still bears scars from where the tree has been ripped off its roots. Definite and undeniable flood evidence. Thanks to Ben and Isaac for the great find and careful excavation.

Jurassic Ark excavations continue to confirm the majority of petrified trees are southern conifer varieties such as Bunya, Norfolk Island, and Hoop Pines, including their seed scales and cones. We have always aimed JA to be an onsite see all teaching display, where people can view things as fossils are dug up, yet the fossils are left in the ground under protection for all to see and learn how to recognise a flood deposit.

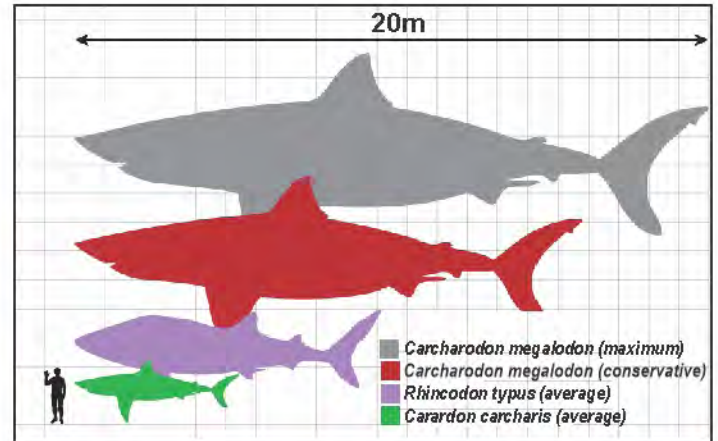

Found by John Mackay, this beautiful polystrate block shows one fern lying horizontally along a strata, with a second fern wrapping vertically around a curved surface through the strata. The very obvious result of a chaotic flood dump. We needed to find 120 specimens for our first school class in over one year due to Covid. Thank you Jesus for the great haul.

Thanks to all whose financial and prayer support enable us to do this research. Keep it up as it is really needed. Send gifts to addresses on back page or give via creationresearch.net click **DONATIONS**

Despite the Covid limitations of 2021 – our mega bite fossil shark display along with our virtual reality giant gives visitors to Jurassic Ark an idea of how big critters could get in God’s original world. Erected for our very minimal open day in October last year when we were limited to 30 people on 10 ha, (unbelievable we agree) we’ve had great benefit from our pictures in zoom, and in the few public meetings allowed as we have shared the real history of earth - devolution, degeneration, good to bad to worse scenario since God created good, yet man sinned. Sharks are just one example.

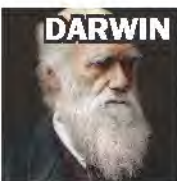

DEFINITELY NOT FISHY. While Covid has shut many doors, we've taken the opportunity of sorting of our magnificent fossils including this South American Fish (right), which is so well preserved you can prove it was buried instantly. Its intestines, eggs, etc are still 100% intact. In fact all the experts who have studied these fish, have concluded they were being injected with preservative chemicals as they were swimming through a flood deposition which rapidly trapped and preserved them.

HANDY FISH?

So God's got a good sense of humour - What's your problem Dawkins or Darwin? The research project on this very rare Tasmanian Spotted Hand fish has been done by Rachelle Hawkins who is part of our Tassy Creation Research Team. Aimed to help restore the pitifully small population of these bottom dwelling Angler type fish, it has attracted international attention. The experts will tell you they are named Hand fish – but these are not hands – the structure is pure fin. They are not halfway evolving into creatures with arms. The truth is these fishy fin's are well suited for walking along muddy bottoms under water - excellent evidence of Christ's design. This project also puts the lie to the myth that people who believe in creation don't do real research – pray for Rachelle as she is the driver behind this project.

DARWIN OFFICIALLY WRONG

150 years after Charles Darwin published the Descent of Man, paleoanthropologist Jeremy DeSilva gathered a team of anthropologists to update and correct Darwin's science. The result, *A Most Interesting Problem: What Darwin Got Right and Wrong About Human Evolution* is a fascinating, and accessible collection of essays. Its most interesting comment: "What did Darwin get right about human evolution in 1871? What did he get wrong - in a word - plenty."

GREEN ROSE DEVOLUTION

Green roses certainly are a change from the usual rose colours we see. How did it happen? Have they evolved? We need to look at how flowers form. From the outside in they possess concentric layers of sepals, petals, stamens and carpel. Research has shown that flower formation is under the control of growth control genes which 'tell' a plant to start making flowers in an orderly sequence starting with the sepals and progressing through to the inner layers. Sepals form the outer covering of the developing flower bud. When the bud opens the sepals form a row of leaf like structures at the base of the flower. But in green roses a mutation causes genetic growth signals to get stuck, and so the unopened bud goes on making sepals, layer after layer, without ever producing the beautiful petals people so love. Eventually the aberrant signal gives up and the bud opens, but the result is a bunch of green sepals rather than a proper flower. (top right)

Some people like these green flowers so rose breeders propagate them which can be done only by cuttings or by grafting since green roses do not have the reproductive structures of a normal flower. Grafting takes a young shoot or bud from a plant and attaches it to the base of another rose. The transplanted shoot will grow and eventually produce more green roses.

**Diane Eager**

Green roses are a vivid reminder that mutations can cause serious change in living things, but they cannot make anything evolve. At best they cause variations in kind; at worse, they cause loss of structure and function such as in the green rose. Creation Research has added a green rose to our extensive collection of unusual plants as a reminder that the real history of living things is from creative design to degeneration, just as the whole world has gone from good to bad to worse. Thanks to Bonita Cattell for donating these for our Jurassic Ark Botanic section, especially from our resident rose lover Diane Eager (left).

FLOOD GAS RESEARCH SUCCESS

Natural gas, coal and oil all show the evidence of being produced from plant and animal products that were flood dumped. Most deposits we have checked, particularly coal and gas, show the presence of volcanic ash clays which has given us a new low tech, low energy production technique.

Above you will see our first application for production and storage of natural gas materials at Jurassic Ark. Students really do enjoy us proving the gas is methane - it burns at high temperatures with a bright blue flame and no odour (above).

**Ignition Test**

The secular world with its millions of years slow swamp produced coal - gas, and "we don't want pollution" mentalities – sadly shows little interest. Praise the Lord He will continue to raise up funds as our work which is primarily designed to ensure people can have safe classroom models to show you don't need a long time - you need the right process, and Noah's Flood was the best for producing massive coal, oil and gas fields which we still benefit from. Thanks to Selwyn for the Engineering.

ONE DELIVERED SIX TO GO Fossil Cover Sheds – Jurassic Ark – Remember the destruction the 2011 floods caused to our fossil flood log jam site – now after proving there are thousands of fossil logs still underground – we are proceeding with constructing protective sheds over the site and we need your help. We've had an engineer on site evaluating how to build these. Costs work out at roughly \$10,000 per hundred square metres. Total number of covers needed is seven.

UK NEED ..Special thanks for new UK van support. £5,000 donated to date, £7,000 to go. Tax deductible UK.

RAIN NEEDED OZ. 10 years ago we were praying for dry, now our Jurassic Ark site is in a rain shadow. Our dam is less than one third full. Water is needed to keep our 10 ha of Biblical Botanic Gardens alive. Even though crowds are still not back to normal post Covid – the plants need to drink every day while this hot weather continues. Pray much for several hundred mls of rain with thanks.

ROSE GARDEN COMING DOWNUNDER. This issue's article about green roses is about a plant that joins our current very few roses at Jurassic Ark. Coming up is a wonderful, beautiful, aromatic and spectacular rose flower garden ..yes along with their thorns part of explaining the real history of plants and the result of man exercising God given dominion in breeding. Pray and donate as we expand our 'Separate Kind' gardens particularly for upper high school students. Anyone wishing to donate particular types of rose (Disease-free please) contact Daryl phone 0418 474 792.

TV COMING AGAIN. THE HARSH UK SHUTDOWN means we will be resurrecting our 2020 weekly TV show starting March. It looks like Joseph and our whole UK team will be locked in until at least middle of July and even though our Aussie team are more free to travel within Australia, we cannot yet move outside the country. So back to our Zoom television program and thank you for your support of the first series 2020 which was incredibly successful and again will be led by Joseph, Sarah Ann, Katie, John and Ben.

GLOBAL WORMING! YES! You read that correctly – it's time to install new lucerne hay bales in each of the gardens at Jurassic Ark to revitalise our worm colonies. We do this every 18 months or so and it has made a wonderful difference to our clay rich sandy soil, as we turn it into a fabulous botanical Gardens. We don't normally buy lucerne hay as it is very expensive, but we have discovered they're the best for actually getting worm colonies activated. They then do their thing underneath the ground which will then spread out and enrich the ground greatly.

FIRST LESSON FOR THE SCHOOL YEAR (March 1) was on worms – how they work – God's genius in worms and the fossil evidence – all squishy, squashy, mucky and yucky – kids loved it. Pray as we continue to turn Jurassic Ark into a really exciting teaching site for Jesus. Second school request also arrived.

STAFF AND HELPERS John, Anne, Sharon, Ben, Daryl, Diane, Craig, Joseph and Sarah Ann depend on your donations to achieve their part of the ministry.

STORAGE CONTAINERS. As the amount of equipment being used at Jurassic Ark increases, we are in need of a large shipping container on site. Estimated cost \$3,000.

RESEARCH INTO COAL, OIL & GAS and fossil formation is proceeding like a house on fire as Covid shutdown gives us time to catch up on research. Our surprising results have been circulated to quite a few professors. Get behind these research efforts with prayer and support. More details on any of these at creationresearch.net, or contact John on info@creationresearch.net or Daryl at Jurassic-ark@creationresearch.net.

ALL BELOW PAID FOR WITH YOUR GIFTS. THANK YOU FOR YOUR BLESSINGS.

COMPUTERS REPLACED. Dr Diane Eager's laptop was approaching IT dinosaur age and needed to be replaced, as the screen was becoming unreadable. Also, one of our UK computers crashed. Both of these now replaced, with many thanks for generous donations.
